Mobile teach-in with PFO SmartTeach.

PFO SmartTeach is an application for your programmable focusing optics PFO. It facilitates generation and set-up of the laser welding and laser cutting programs you execute with the PFO. The integrated camera on the C-mount of the optics transmits the live image to the app. This enables you to teach comfortably right at the component. If you want to generate and teach-in PFO geometries, this can be carried out via intuitive, gesture-based operation on the iPad.

	PFO SmartTeach
Tablet	iPad 2 or newer version/ iPad with iOS 7.0 or newer version
Supported languages	German, English
Supported PFOs	All PFOs with TruControl 1000
Camera system	TruControl 1000/ Module VideoApp
Available from	Apple App Store

Subject to alteration. Only specifications in our offer and order confirmation are binding.

PFO SmartTeach:
Your benefits at a glance.

- 1 Mobile teach-in.
- 2 Saves time.
- 3 Easy to operate.

Time savings via mobile teach-in.

Thanks to PFO SmartTeach you save a lot of set-up time – depending on the component this can be as much as 50%. PFO SmartTeach synchronizes the generated or changed programs with the laser. Users of the control software TruControl will adjust to it quickly because the familiar properties for generation of a PFO program have been retained. Known sequences and functions have been preserved. PFO SmartTeach is available free of charge from Apple's App Store and can be tested without risk. For productive use, activate the option "PFO SmartTeach App".
